

16g New Generation Stretcher XL

Patient Transport – made easy

In the case of a sick or injured flight guest, a stretcher is an indispensable device. Especially if the stretcher is able to offer the highest possible degree of comfort. That is, as long as it fulfils the latest safety requirements. The “New Generation Stretcher” from Bucher is fully able to meet all such requirements.

Benefit from advantages that add up on all counts:

- Time savings: Installation within 10–15 minutes and disassembly in approx. 5 minutes
- Cost benefits: With its outstanding ease of maintenance, relevant costs are kept strictly under control
- Quality benefits: We are listed as the sole stretcher supplier in the Airbus Purchaser Technical Specification (PTS)
- Patient satisfaction: Thanks to its accessibility and its wide range of different couch settings, the NGS offers safety and comfort for the patient
- Certifications: We meet the regulatory requirements of EASA, FAA and various other countries (e.g. CAAC China, Japan, Saudi Arabia, Brazil, etc.)

At just 38 kg, the NGS convinces with practical functionality and is ready for patient transport in the blink of an eye. Folded together in a box, the stretcher saves space in the cargo area and can be transported to wherever you need it.

NGS Stretcher – Technical Specifications:
