High-end

Smart kinematics

Bucher Aerospace Corporation

## Company Overview

# Company profile

Bucher Aerospace Corporation develops and manufactures mechanisms and assemblies for aircraft cabins and passenger interiors of transportation vehicles.

We serve our Customers all over the world from our facility in Everett-Seattle (USA) with solutions for high-end applications of cinematically complex devices.

Bucher Aerospace is proud to work not only for leading companies in the business jet and commercial aircraft sectors, but also to deliver our reliable and customized products to automotive and railway customers.

Our quality promise in six words: **Good parts, on time, always better.**  
... and Bucher Aerospace mission statement:

We **listen** to ideas,  
we **understand** mechanisms,  
we **resolve** by creating elegant solutions,  
we **deliver** what we promise.

**We know** We do.

Our value promise goes beyond our products: Bucher Aerospace produces solutions. To do so, we listen to fully understand what the customer is looking for; we develop lightweight, reliable mechanisms with low maintenance requirements and we organize an efficient supply chain with internal operations and partners on the supply side. We know our expertise. We do to deliver. And we know we do by continually measuring and improving our performance.

## Key product features

 **Minimum weight** and maximum stability is the idea that shaped the foundation of Bucher back in 1953.

 The superior design and function of our products is reflected in **high-end aesthetics**.

 **Intuitive** and ease-of-operation rounds up our elegant solutions combining comfort and functionality without compromises.

 Careful choice of materials, intentional avoidance of intensive-servicing components (e.g. electrical actuators or sensors) and dedicated testing are the keys to the superior **reliability and low-maintenance** of our products.

 A wide supplier base, sound engineering judgement and in-house manufacturing capabilities allow us to offer a **cost-optimized** production regardless of the quantities ordered.

## Certifications and Awards

■ FAA Part 145 certified repair station

■ ISO 9001:2008 certified quality management system

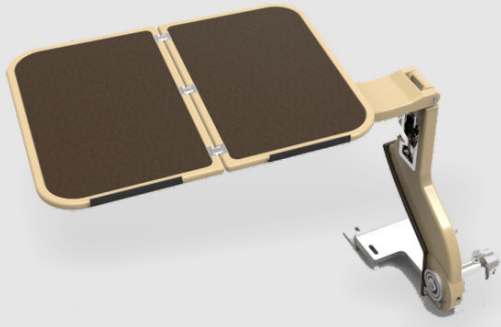

■ AS9100 Rev. C quality system

TABLES

- VIP, first-class and business-class table applications.
- All mechanical for less weight and more reliability.
- Manual, assisted and full automatic deploy.
- Virtually all rotational and positional adjustments possible.
- Adapted kinematics for individual deployment needs.

IN-FLIGHT ENTERTAINMENT

**TABLET SUPPORTS**  
**MONITOR ARMS**  
**EFB HOLDERS**

- Robust and reliable design.
- Manual or assisted deployment.
- Highly customizable motion features.
- High variety of cabin integration possibilities: armrest, side-wall, side-ledge, pop-up, plug-in...

CARTS & CATERING

- In-flight service carts with stylish and modular design, distinctive of our Swiss heritage.
- High quality piano hinge for longevity.
- Vintage, trend-setting airline cart also available for your home or office at [www.alcarts.com](http://www.alcarts.com).

**AL.CARTS** ✈️

CABIN COMPONENTS

**SEAT COMPONENTS**  
**SEAT CONSOLES**  
**SLIDING DOORS**

- Sleek industrial design.
- Variety of finishing options.
- Avoidance of electrical actuators and sensors for higher reliability and lower maintenance costs.
