

Crew Work Stations

High functionality – more productivity

Today's flight crew members have to acquaint themselves repeatedly with new technological developments. Especially the modern airplanes are equipped with innovative technologies and advancements. To facilitate the work for flight crew members, we developed Crew Work Stations (CWS) exactly for these needs. Our CWS increases the comfort and simplifies the handling for the crew distinctly. On top of that, it enables controlling the entire airplane cabin from a centralized point.

Geared to the highest demands, reliable functionality and ergonomical handling, we produce and design our modern, lightweight CWS according to the customer's requests.

During development and production, we focus on:

- Lightweight design: Our signature feature of all our products
- Efficiency: Cost-efficient solutions with reliable functionality
- Comfort: Ergonomical design and handling
- Customization: Adaptable according to your specific requirements

For over 60 years now, the name Bucher stands for passion and innovation in lightweight construction – experienced on every single flight.

Long-term experience in designing, developing and production guarantee another successful and reliable product from Bucher. Contact us for more information, our Sales team is glad to assist you at any time.

More efficiency – more opportunities

Crew Work Stations incl.:

- Stowable seat
- Work surface
- Integration of all electrical components
- Electrical system incl. power outlets
- lockable storage compartments
- Air system
