

To join our team in the **Office of Airworthiness** in the area of MIC (Medical Interior Components), we are currently looking for a

Compliance Verification Engineer (m/w/d)

ÜBER UNS 

What we offer:

- Unique projects in air rescue for various international customers
 - A committed and motivated team
 - We foster trust and direct responsibility
 - Attractive terms of employment, opportunities for training and professional development
- As a family owned business, we successfully deliver high quality products to the market since 70 years

Your tasks

- Planning and execution of certification projects in the helicopter emergency medical services (HEMS) equipment market
- Classification of minor/major changes, approval of minor changes
- Preparation and approval of certification plans and compliance demonstration documents (e.g. qualification test reports, safety assessments)
- Communication with suppliers and authorities
- Witnessing of certification tests
- Advising the design department with regards to airworthiness, participation in design reviews
- Participation in the continuous improvement of the design organization

With this you convince us:

- Degree in mechanical engineering (ETH/FH/TS), aviation (FH) or equivalent
- Several years of professional experience in the certification of aviation products, preferably as CVE
- Profound knowledge of EASA Part 21, certification specifications, safety assessment and equipment qualification. Knowledge of flight testing and safety management an advantage
- Focus on quality, team player
- Good spoken and written English and German language skills

For further information don't hesitate to call Daniel Aeschlimann, Chief Office of Airworthiness, Tel. +41 44 806 28 58.
